TO MY MANY PATRONS AND FRIENDS

It is with the greatest of pleasure that I present to you, this my twenty-third catalogue and price list of Dahlias and Gladioli, and to thank you for the patronage you have given me in the twenty-three years I have grown them. I shall endeavor the coming Season to send out only the best of stock and true to name, to arrive in good growing condition, and will replace any that are not satisfactory.

With best wishes I am yours for more and better Dahlias and Gladioli.

W. D. HATHAWAY.

MY STOCK consists of pot roots and field grown roots. Where I cannot send roots I will supply in plants, at reduced prices from roots.

ORDER EARLY as stock of some of the latest varieties is limited owing to the many orders taken in the fall.

WHERE STOCK IS EXHAUSTED I do not substitute, but return money unless otherwise ordered.

HOW TO PLANT

First spread your dressing or fertilizer on the top of the ground, spade in to a depth of 12 or 18 inches, mixing thoroughly with the earth, dig the holes 5 or 6 inches deep, lay the tuber flat down and cover. Do not water until the sprout shows through the ground, keep the ground well cultivated, do not allow it to get baked around the plants, only allow one stalk to grow in a place.

TERMS. Cash with order or in advance of shipment.

This list cancels all previous prices.

Bargain list of Dahlias on page 30.

In visiting the many Shows and Gardens last fall I selected the following as the best of the new varieties grown or exhibited. They are all good rugged growers, have fine large flowers and good long stems, which hold the flowers well above the foliage. The most of them have won the highest awards wherever shown. The descriptions are, in most cases the originators.

ADA PATTERSON (H. C.) One of the best white hybrid cactus dahlias to date. The flowers are pure white, and average 8 to 9 inches in diameter. The plant is a beautiful grower, reaching a height of seven feet. The large blooms are held well above the foliage on stiff stems that can be cut 4 to 5 feet in length. A splendid keeper, and equally good for exhibition and decorative purposes. Tubers, \$10.00 net. Plants, \$5.00.

ALTAMONT (Dec.) Rose-pink, deepening to American Beauty Rose toward the center of the flower. The flower is large, averaging 8 inches and over in diameter, full decorative type, with long slightly curled petals, giving the individual blooms a very artistic finish. Its tall growing habit, with its long slender stalks makes it possible to cut the bloom with stems 6 to 8 feet in length. A splendid keeper and one of the best exhibition varieties ever originated. Plants only, \$5.00.

COPPER KING (Dec.) Most wonderful flower of enormous size held erect on straight, strong stem, this magnificent bloom has tubular petals of copper and yellow, with distinct reverse of light red. This is one of the finest creations. Tubers, \$15.00 net. Plants, \$7.50.

DURANT (Dec.) A new Murphy seedling with extra strong growing qualities. The large blooms are held high on the best of stems. Color is of the autumn shade, a combination of yellow, buff, salmon and gold, that popular shade everybody likes, fine cut and exhibition flower. Tubers, \$5.00 net. Plants, \$2.50.

EASTERN STAR (Dec.) Color a soft saffron-yellow with old gold shadings. Flowers of great substance and good keeping qualities, with full centers held on strong erect stems. Excellent habit of growth and free flowering. An immense exhibition dahlia with cut flower qualities. Tubers, \$10.00. Plants, \$5.00.

ELLINOR VANDEVEER (Dec.) An incomparable dahlia of exquisite beauty and great size, having every desirable quality. The large blossoms are of great depth and substance, and held far above a tall, sturdy bush, on exceptionally long stems. The large flowers are of a glowing, satiny, rose-pink. One of the very first to bloom in our garden, making it very desirable where the blooming season is short. Tubers, \$7.50. Plants, \$3.75.

ELITE GLORY (Dec.) One of the most sensational Dahlias for 1926. A monstrous flower that is not at all awkward but is both pleasing and spectacular in appearance. The color is a brilliant rich red without any apparent purple or maroon shading. The gigantic blooms are held boldly erect on heavy stems and it will keep remarkably long after cutting. One of the grandest exhibition and garden dahlias yet introduced. Tubers, \$25.00 net. Plants, \$10.00.

ELIZA CLARKE BULL (Dec.) Bessie Boston's superior white Decorative Dahlia. It is one of the largest and deepest flowers of its class. The form is perfect and the petals are just enough irregular to prevent it from being stiff. It has, however, a heavy, firm stem, which carries the flower erect and out of the foliage. A free bloomer on bushes of medium height. Tubers, \$7.50. Plants, \$3.75.

EMMA MARIE (H. C.) A favorite because of its pleasing shade of clear pink, with a creamy white center and its combination of exhibition and commercial qualities not found in many dahlias. It is a robust grower, producing deep full centered blooms averaging 8 inches on very long stems. Tubers, \$6.00. Plants, \$3.00.

GLORY OF MONMOUTH (Dec.) Eosine pink, shading to strawberry-pink at center of petals. Base of petals light orange, a new color combination in dahlias. The plant is semi-dwarf in habit, wide spreading and very sturdy. The large flowers are carried on very strong, long stems. The blooms are produced in great profusion and are very rich and pleasing. A wonderful garden and exhibition variety and a good keeper when cut. Plants only, \$5.00.

GRACE SCHINOTT (Dec.) A very large beautiful flower. The color is strontion yellow shaded with salmon. A good bloomer on wonderful, long, strong stems. The bushes are of medium height and of luxurious growth, which produce the beautiful blooms well out of the foliage. A good all round flower. Tubers, \$5.00. Plants, \$3.00.

HARVEST MOON (Dec.) Another one of the Marean family. The flowers are large and are of fine form. The color is a beautiful shade of yellow. The stems are all that could be asked for. MRS. C. FLOOD. The best real baby pink we have, in bud opening the color is white and gold and quickly changes to pink, and when the blossom matures it is the most delicate of all pinks.

N. C. 4. This is a hard Dahlia to describe, as it is about equally divided with scarlet and white, the florets are more or less striped the whole length with yellow and white; reverse side of petals are white with yellow shadings. A very beautiful flower.

NOUVELLE. A very beautiful and novel shading of pink and cream. A huge deep flower with a perfect stem. The bushes were very tall and sturdy and laden with blossoms throughout the season. A Dahlia which should succeed everywhere as it has been well tested in a warm climate.

The average bloom is 7 inches in diameter, a good steady bloomer, the bloom is placed on the end of the stem, and lasts excellent as a cut flower. The color is a bold canary yellow, blending with most any other color.

- BLOSSOM.** 1920 introduction of one of the finest new peony dahlias.
